

Course Recap

CS 272 Software Development

Professor Sophie Engle

Department of Computer Science

Evaluations

Course Evaluations

- BLUE Evaluations
 - Conducted by university
 - Used by instructors AND university
- Belonging Survey
 - Specific to course
 - Related to research project

Where did we start?

What was the first code we covered?

Project Euler, Problem 1

If we list all the natural numbers below 10 that are multiples of 3 or 5, we get 3, 5, 6 and 9. The sum of these multiples is 23. Find the sum of all the multiples of 3 or 5 below 1000.

<https://projecteuler.net/problem=1>

What was the first code we covered?

```
int max = 1000;  
int sum = 0;  
  
for (int i = 0; i < max; i++) {  
    if (i % 3 == 0 || i % 5 == 0) {  
        sum += i;  
    }  
}
```

<https://github.com/usf-cs272-spring2022/lectures/tree/main/ProjectEuler>

What was the first homework?

ArgumentMap

For this homework, you will create a class to parse command-line arguments and store them in a map. For example, consider the following command-line arguments:

```
"-a", "ant", "-b", "bee", "-b", "bat", "cat", "-d", "-e", "elk", "-f"
```

In this case, `-a` `-b` `-d` `-e` and `-f` are all flags since they start with a `-` dash followed by at least 1 non-digit character. The values are `ant` `bee` `bat` `cat` and `elk` since they do not start with a `-` and non-digit character.

Note that `-42` is not a flag because the `-` dash is followed by a digit character. Instead it should be interpreted as a value representing a negative number.

Not all flags have values, not all values have associated flags, and values will be overwritten if there are repeated flags. For example, flag `-`

Java Packages

- java.math, java.text, java.time
- java.io (print writer, buffered reader)
- java.lang (thread, object)
- java.net (socket, uri, url)
- java.nio (path, directory stream)
- java.util (collections framework, concurrent, regex, function, stream)
- java.logging (logger, level)
- java.sql (statement, result set)

Historical Perspective

- Know someone **179** or older?
 - The first computer program or algorithm was published in 1843.
- Know someone **86** or older?
 - Formal models of algorithms and modern computers were invented in 1936.

https://en.wikipedia.org/wiki/Computer_science • https://en.wikipedia.org/wiki/History_of_computer_science

Historical Perspective

- Know someone **62** or older?
 - The term "computer science" first appears in literature in 1959.
- Know someone **59** or older?
 - The first CS degree in the US was offered at Purdue University in 1962.

https://en.wikipedia.org/wiki/Computer_science • https://en.wikipedia.org/wiki/History_of_computer_science

Historical Perspective

- Know someone **53** or older?
 - The first message was sent over ARPANET, the precursor of the Internet, in 1969.
- Know someone **51** or older?
 - The first personal computer was released in 1971.

https://en.wikipedia.org/wiki/Computer_science • https://en.wikipedia.org/wiki/History_of_computer_science

Historical Perspective

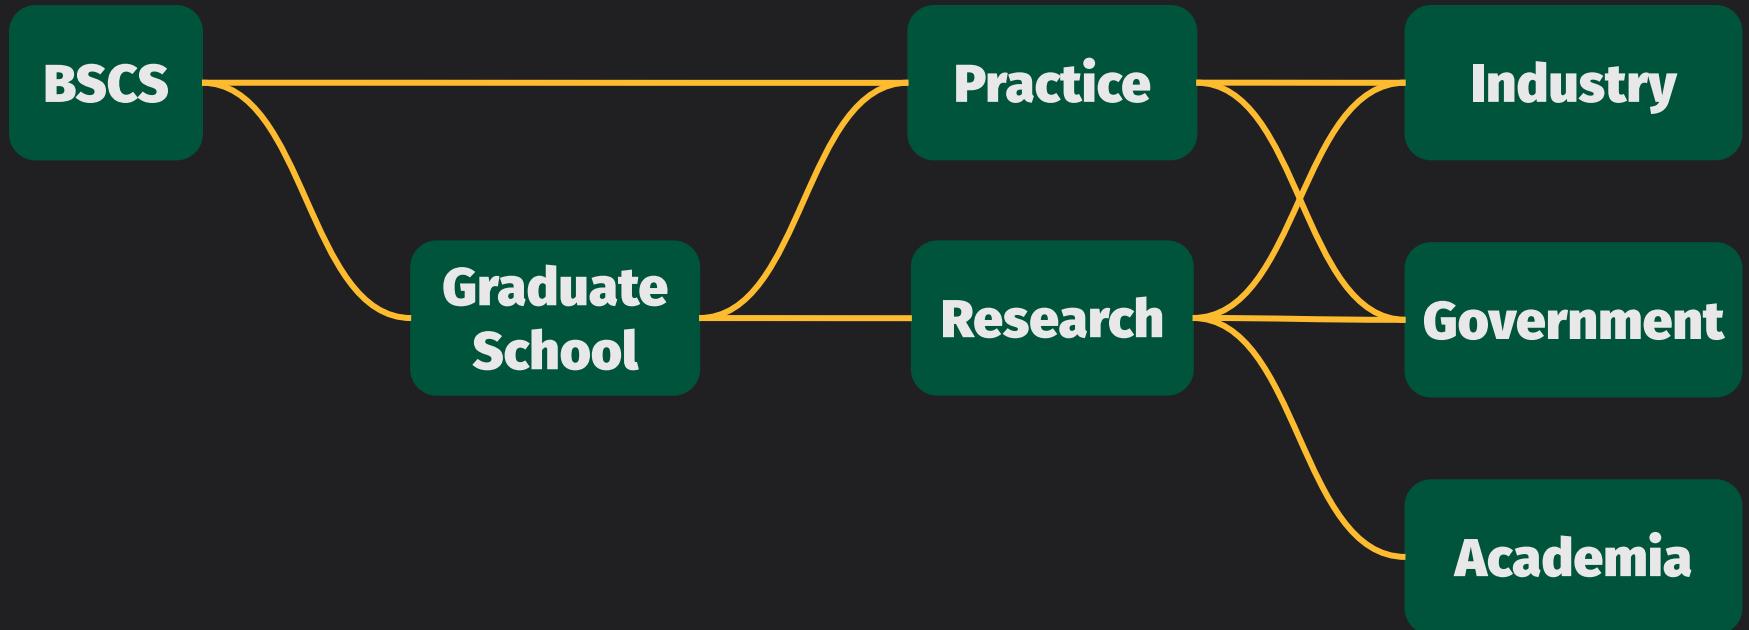

- Know someone **33** or older?
 - The World Wide Web was invented in 1989.
 - The Python programming language was first implemented in 1989.
- Know someone **15** or older?
 - Apple released the first iPhone in 2007.

Computer Science...

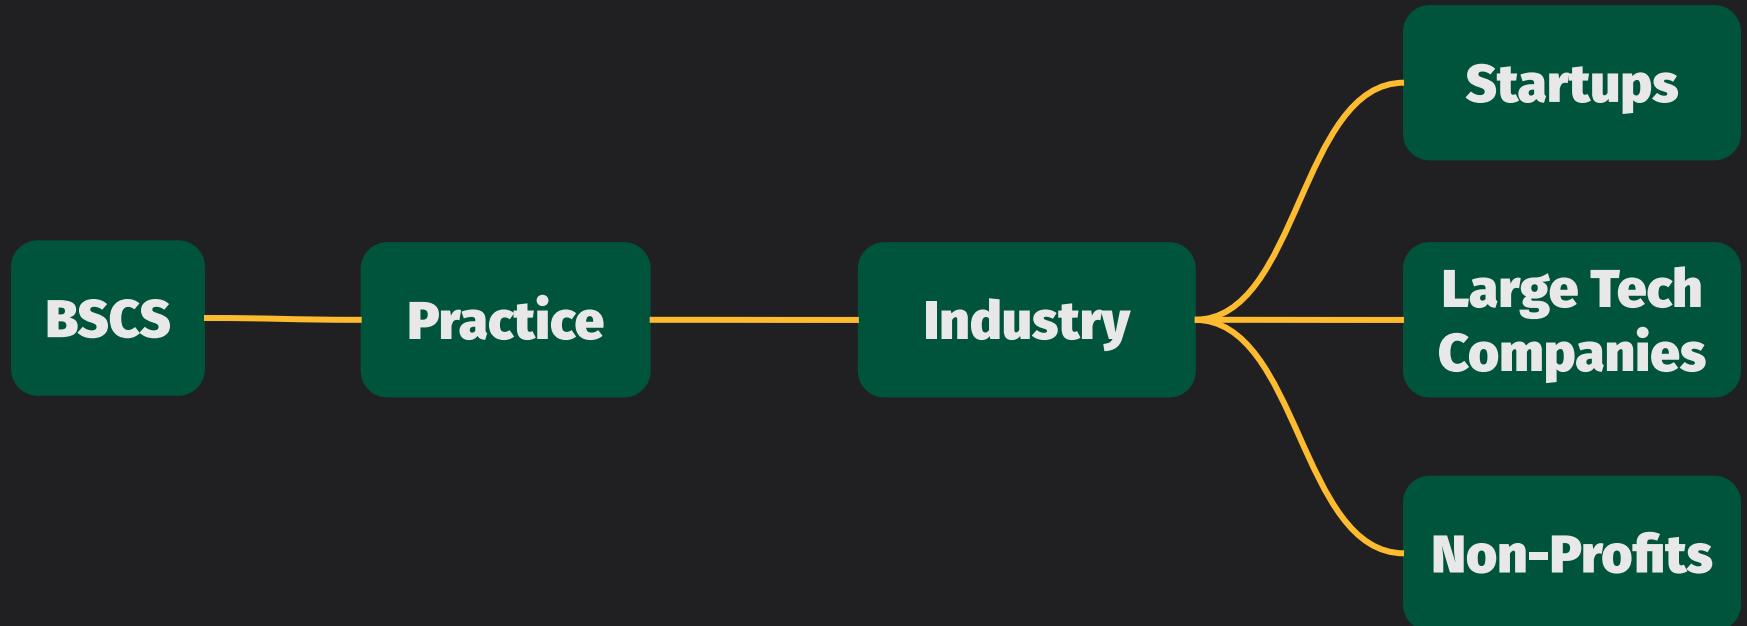

- Constantly changing
 - Must be constantly learning
- Increasing in ubiquity, impact, and importance
 - Must consider ethics, diversity, accessibility
- Multiple career paths and subfields
 - Sometimes tricky to find what is right for you

Career Paths in CS

*General picture, exceptions exist!

Career Paths in CS

**General picture, exceptions exist!*

Many Possible Job Titles...

- First, choose a broad specialization...
 - Software, Security, Network, Systems, Database, Data, Cloud, UX, etc.
- Next, choose a job title...
 - Developer, Engineer, Analyst, Administrator, Architect, Designer, Manager, Researcher, Scientist, Teacher, etc.
- Or, choose a more focused specialization...
 - Finance, Computational Biology, Bioinformatics, Medicine, Games, Environment, Education, etc.

Closing

BE PROUD!

You are a computer scientist.
You have a powerful skill set.
